EMPLOYMENT HISTORY

2013 - 2015 (Afghanistan/Pakistan): Commercial with an artisanal honey producer (international distribution)

2016 - 2018 (Sweden): Tourist guide in Älvkungen.

2019 - dec 2020 (France): Volunteer interpreter at the Scarabée association.

Since dec 2020: Junior developer for Blackbird (Jam)

[Jam](#) is a conversational media, a robot in Facebook Messenger, which aims to inspire young people in their daily life by offering them a subject on which they can give their opinion. My role was to design and develop new features in the multi-bot data restitution system and the redaction tool for the chatbot content writers.

Here is a [letter](#) of recommendation from Valentin Shamsnejad, the CTO of Jam.

Acquired :

- APIs, MVC, Scrum, Tests, CI/CD
- Programming languages : Javascript, Ruby, Bash
- Other dev tools : Git, Github, Heroku, Linux
- Database : PostgreSQL
- Frameworks : VueJS, Ruby on Rails, Bootstrap

Experiences :

- Design a customer management system for [trends.hellojam.fr](#)
- Design and development of several features in a multi-bot data recovery system
- Construction and creation of an API and an interface for the reference message in the authoring site for the chatbot
- Design and development Moderation interface for [Hello Jam](#)

SKILLS

Languages :

- Pashto (native)
- French (b1)
- English (b1)
- Persian/Dari
- Urdu/Hindi

INTERESTS

Projects :

- Building quotes [api](#) containing over 59k
- Building a Guessing Quotes [game](#) with the help of quotes [api](#).

Reference works: Clean code, Scrum & XP, Ruby Notes For Professionals, POODR (Practical Object-Oriented Design in Ruby)

Hobbies :

- [Codewar](#), chess, running, hiking, snowboarding movies, series and online games
